HOT LOOKS FOR THE COLD MONTHS

A trench coat, a bright plaid or a wild print, this winter let your inner diva sizzle!

Fashion has gone bold and strong in the #MeToo era. Women are dressing up to feel more self-assured and confident. Power is coming across in head-to-toe animal prints, in a nod to the fighting spirit of the '70s. Some are going calmer, the classic way, with coats and tweeds, playing up the bright checks or the solid greys. The emphasis is not on hiding, but shinning through the jargon; holding out on your own.

Explore THE WILD SIDE

This winter, fashion is going wild over animal prints! From leopard to zebra and from tiger to snake, wild stripes and spots are the rage, showcasing independence and power. If you don't want to go all-wild, throw on a solid coloured coat and accessorise with minimal statement pieces.

Checks never fail. Small or OTT, woven or printed, checks are classic. This season, break the norms of wearing checks and flaunt them in bold vibrant colours and balance with colour blocking in other pieves. For example, pick a solid shirt or a top or a trouser if the blouse in is checks. Accessorise whimsically!

WAR PAINT STRATEGIES AT THE WORK PLACE

Tricks of the trade for flexible makeup that work at work and at play

Work place makeup is a tricky area. You do too little, you look too bare. You overdo and chances are you will be called the “makeup queen”. What’s adds to the challenge is that often we have no option but to tweak our formal face to go out in the evening. So, how to achieve the perfect balance? We put together a handy guide of the nine most important dos and don’ts of makeup rules at work. Follow them and you can never go wrong!

Dos and don’ts

1.

Use a little bronzer under your foundation and blend it well. This will give you a sun kissed subtle dewy glow, and take away any sign of the day’s tiredness. Another upside of this trick is that it works like magic after work too. The glow works well for that dinner date.
2.

Try sticking to neutral, or blush shades in lipsticks at work, though reds are quite acceptable too. But pinks work the best for most Indian complexions. Keep the reds for a power meeting, where you need attention. If you don’t get time to wipe your lips clean and apply another shade, stash a glittery gloss in your work drawer. Swipe it on once you are off and you will be ready for the after-work party. A neutral gloss is the best; will look good on its own as well!
3.

Keep fake lashes at bay, you do not want to distract colleagues and other co-workers with exaggerated eye makeup. Instead, coat your lashes with a smooth layer of mascara; they will look naturally elongated and make you look elegant.
4.

Go easy on the eye shadow at work; overdose of eye shadow can be disastrous. Use little amounts of earthy tones and
5.

A simple blow-dry is the best option for a workday. Stay away from complicated hairdos; these are time consuming, and require maintenance, and you do not want to get distracted from work because of your hair. Just before stepping out, run a
6.

Avoid going dark on your eyes, they are great for parties but no for work or a date.
7.

At office, do not opt for vibrant colours or externally attached nail enhancements. Keep them well manicured short and go for nudes and elegant colour options; they make your hands look elegant and
8.

Do not go near any frosted or glittery makeup products for your office look. They are just inappropriate and distracting.
9.

Contouring and strobing can be alluring techniques but they are not necessary for work, or a casual date.
